Dedication.....	v
Quotations.....	vi
Table of contents.....	vii
List of symbols.....	xi
Foreword.....	xiii
Preface.....	xv

Chapter 1 - Paper 1

1. An alternative electrodynamics to the theory of special relativity	
Abstract.....	1
1.1 Introduction.....	1
1.1.1 Maxwell's equation of electromagnetic waves.....	3
1.1.2 Michelson-Morley experiment.....	4
1.1.3 Galilean-Newtonian relativity.....	4
1.1.4 Doppler Effect.....	5
1.1.5 Larmor formula of classical electrodynamics.....	6
1.1.6 Rutherford's nuclear model of the hydrogen atom.....	7
1.1.7 Bertozzi's experiment.....	7
1.1.8 Aberration of electric field.....	8
1.2 Equations of motion in radiational electrodynamics.....	9
1.2.1 Equations of rectilinear motion.....	10
1.2.2 Equations of circular motion.....	12
1.3 Radiation force and radiation power.....	13
1.4 Mass-energy equivalence equation.....	14
1.5 Conclusion.....	15
1.6 References.....	16

Chapter 2 - Paper 2

2. Revolution of a charged particle round a centre of force of attraction	
Abstract.....	19
2.1 Introduction.....	19
2.2 Unipolar motion under a central force.....	22
2.2.1 Velocity and acceleration in unipolar central motion.....	22
2.2.2 Angular momentum.....	24
2.2.3 Forces on a revolving charged particle.....	24

2.2.4	Equation of the unipolar orbit of motion.....	25
2.3	Bipolar motion under a central force.....	27
2.3.1	Description of bipolar orbit.....	27
2.3.2	Velocity and acceleration in a bipolar orbit.....	27
2.3.3	Equation of bipolar orbit of motion.....	29
2.4	Free ellipse and stable orbit of revolution of a radiating charged particle.....	30
2.5	Energy radiated by a revolving charged particle.....	31
2.6	Period of oscillation of a radiator.....	33
2.7	Conclusion.....	38
2.8	References.....	39

Chapter 3 - Paper 3

3. A nuclear model of the hydrogen atom outside quantum mechanics

	Abstract.....	41
3.1	Introduction.....	41
3.1.1	Rutherford's nuclear model of the hydrogen atom.....	41
3.1.2	An alternative nuclear model of the hydrogen atom.....	44
3.2	New nuclear model of the hydrogen atom.....	44
3.2.1	Equation of the orbit of motion.....	44
3.2.2	Radiation from the new nuclear model.....	45
3.2.3	Number of orbits in the new nuclear model.....	47
3.3	Conclusion.....	47
3.4	References.....	48

Chapter 4 - Paper 4

4. A non-nuclear model of the hydrogen atom

	Abstract.....	49
4.1	Introduction.....	49
4.1.1	Alternative model of the hydrogen atom.....	50
4.2	Non-nuclear model of the hydrogen atom.....	51
4.2.1	Equation of the orbit of motion.....	51
4.2.2	Radiation from the non-nuclear model.....	51
4.2.3	The Balmer-Rydberg formula.....	53
4.2.4	Number of orbits in the non-nuclear model.....	54
4.3	Bipolar model versus nuclear model.....	54
4.4	Conclusion.....	55
4.5	References.....	57

Chapter 5 - Paper 5

5. On the speed of light in a moving medium

Abstract.....	59
5.1 Introduction.....	59
5.2 Speed of light reflected from a moving medium.....	60
5.3 Reflection angle from a moving medium.....	62
5.4 Speed of light transmitted in a moving medium.....	63
5.5 Fizeau's experiment.....	64
5.6 Non-relativistic explanation of result of fizeau's experiment.....	64
5.7 Relativistic explanation of the result of Fizeau's experiment.....	66
5.8 Conclusion.....	68
5.9 References.....	69

Chapter 6 - Paper 6

6. On the energy and mass of electric charges in a body

Abstract.....	71
6.1 Introduction.....	71
6.2 Energy content of an electric charge distribution.....	70
6.3 Mass of an electric charge and charge distribution.....	75
6.4 Conclusion.....	78
6.5 References.....	79

Chapter 7 - Paper 7

7. A unification of electrostatic and gravitational forces

Abstract.....	81
7.1 Introduction.....	81
7.2 Newton's law of gravitation.....	83
7.3 Coulomb's law of electrostatics.....	84
7.4 Electrostatic and gravitational forces between charges.....	85
7.5 Electrostatic force between two neutral bodies.....	86
7.6 Gravitational force between two neutral bodies.....	87
7.7 Conclusion.....	88
7.8 References.....	89

Chapter 8 - Paper 8

8. Explanations of the results of Roger's and Bertozzi's experiments without recourse to special relativity

Abstract.....	91
8.1 Introduction.....	91
8.2 Classical electrodynamics.....	93
8.2.1 Potential energy lost by an accelerated electron.....	93

8.2.2	Potential energy gained by a decelerated electron.....	94
8.2.3	Circular revolution of an electron.....	94
8.3	Relativistic electrodynamics.....	95
8.3.1	Potential energy lost by an accelerated electron.....	95
8.3.2	Potential energy gained by a decelerated electron.....	96
8.3.3	Circular revolution of an electron.....	96
8.4	Radiational electrodynamics.....	96
8.4.1	Motion of an electron in an electrostatic field.....	96
8.4.2.	Potential energy lost by an accelerated electron.....	98
8.4.3	Potential energy gained by a decelerated electron.....	99
8.4.4	Accelerating force in circular revolution.....	99
8.5	Roger’s experiment.....	100
8.6	Bertozzi’s experiment.....	101
8.7	Radius of revolution in a circle.....	103
8.8	Conclusion.....	103
8.9	References.....	105

Chapter 9 - Paper 9

9.	Longitudinal wave propagation along an electric field.	
	Abstract.....	107
9.1	Introduction.....	107
9.2	“Pressure” in an electric field.....	109
9.3	“Elasticity” of an electric field.....	109
9.4	“Density of an electric field.....	110
9.5	Longitudinal wave propagation.....	111
9.6	Transverse wave propagation.....	112
9.7	Skin Effect.....	113
9.8	Polarization of light.....	114
9.9	Conclusion.....	115
9.10	References.....	116

Appendix 1 – Comparison of some equations in classical, relativistic and radiational electrodynamics.....117

Appendix 2 – Bohr’s derivation of Balmer-Rydberg formula.....125

Appendix 3 – Revolution of a neutral body in a closed ellipse.....128

Appendix 4 – A proposed experiment to test radiational electrodynamics.....134

Appendix 5 – Some physical constants.....136

Index.....139
